AQC Vision, Mission & Philosophy

Your home, your choice, our care ...

VISION

Adelaide Quality Care will be a leader in the area of home and community care service provision.

MISSION

Our ethos of 'providing an exceptional standard of care, the same level that we would expect for our family members', drives our endeavours to achieve service excellence in an environment that supports the wellbeing, independence, dignity and respect for those in our care.

PHILOSOPHY

Adelaide Quality Care is committed to an approach to care and services that celebrates the contributions of both disabled and older people, seeking to work with them to ensure that they continue to maintain their chosen lifestyle by:

- ❖ Providing Consumer Directed Care*
- ❖ Working with care recipients, staff and community members to continually improve the scope, diversity and quality of the care and services we provide*
- ❖ Ensuring we value and develop our staff by increasing their knowledge, skills and experience in aged and disability services so that we can offer best practice care and service systems to care recipients and their families.*
